16. Abstracts

This list of minority construction contractors was gathered mainly thru the good graces and cooperation of the many local Urban League offices. Several contractors and other government agencies also supplied some data.

Every minority construction businessman, of course, is not listed, and some of those listed are not large enough to handle sizable construction jobs. The majority of these contractors have had some experience in medium-sized jobs and any prime contractor who uses minority contractors as subs is lending a much-needed helping hand.
